B.A. ECONOMICS HONOURS (MAJOR, MINOR AND GENERAL FOUNDATION COURSES)

SYLLABUS

PROGRAMME OUTCOMES (PO):

At the end of the graduate programme at Calicut University, a student would:

| Knowledge Acquisition: |
|--|
| Demonstrate a profound understanding of knowledge trends and their impact on the |
| |
| chosen discipline of study. |
| Communication, Collaboration, Inclusiveness, and Leadership: |
| Become a team player who drives positive change through effective communication, |
| collaborative acumen, transformative leadership, and a dedication to inclusivity. |
| Professional Skills: |
| Demonstrate professional skills to navigate diverse career paths with confidence and |
| adaptability. |
| Digital Intelligence: |
| Demonstrate proficiency in varied digital and technological tools to understand and |
| interact with the digital world, thus effectively processing complex information. |
| Scientific Awareness and Critical Thinking: |
| Emerge as an innovative problem-solver and impactful mediator, applying scientific |
| understanding and critical thinking to address challenges and advance sustainable |
| solutions. |
| Human Values, Professional Ethics, and Societal and Environmental Responsibility: |
| Become a responsible leader, characterized by an unwavering commitment to human |
| values, ethical conduct, and a fervent dedication to the well-being of society and the |
| environment. |
| Research, Innovation, and Entrepreneurship: |
| Emerge as a researcher and entrepreneurial leader, forging collaborative partnerships |
| with industry, academia, and communities to contribute enduring solutions for local, |
| regional, and global development. |
| |

PROGRAMME SPECIFIC OUTCOMES (PSO):

-

At the end of the BA Economics Honours programme at Calicut University, a student would:

| PSO1 | Understand basic concepts of economics |
|------|--|
| PSO2 | Examine the socio-economic problems and find out the strategies to overcome these problems through community engagement |
| PSO3 | Achieve organizational, management and leadership skills |
| PSO4 | Acquire skills to evaluate contemporary socio-economic issues by accessing information from various sources and analyzing the collected information using software |
| PSO5 | Understand diverse needs of the marginalized segments of the society and equip them to engage in endeavours leading to their emancipation |
| PSO6 | Be able to inculcate ethical values and to avoid unethical practices such as plagiarism, misrepresentation of data and violation of intellectual property rights |

| PSO7 | Apply analytical thinking to various economic phenomena, including analysis and evaluation of economic policies, practices, evidences, arguments, claims and beliefs |
|------|--|
| PSO8 | Develop appropriate skills and knowledge to address the real world economic issues in familiar and unfamiliar contexts |
| PSO9 | Formulate appropriate and relevant research questions, develop methodology and tools for data collection, presentation and analysis, and predict cause-effect relationships to deal with problems and situations to be solved through innovative practices |

MINIMUM CREDIT REQUIREMENTS OF THE DIFFERENT PATHWAYS IN THE THREE-YEAR PROGRAMME IN CUFYUGP

| Sl. No | Academic Pathway | Major | Minor/ Other Disciplines | Foundation Courses AEC: 4 | Intern -ship | Total Credits | Example |
|-----------|---|--|--|--|-----------------|------------------|---|
| | | Each course has 4 credits | | MDC: 3 SEC: 3 VAC: 3 Each course has 3 credits | | | |
| 1 | Single Major (A) | 68 (17 courses) | 24 (6 courses) | (13 courses) | 2 | 133 | Major: Economics + six courses in different disciplines in different combinations |
| 2 | Major (A) with Multiple Disciplines (B, C) | 68 (17 courses) | 12 + 12 (3 + 3 = 6 courses) | 39 (13 courses) | 2 | 133 | Major: Economics + History and Political Science |
| 3 | Major (A) with Minor (B) | 68 (17 courses) | 24 (6 courses) | 39 (13 courses) | 2 | 133 | Major: Economics Minor: History |
| 4 | Major (A) with Vocational Minor (B) | 68 (17 courses) | 24 (6 courses) | 39 (13 courses) | 2 | 133 | Major: Economics Minor: Taxation Practices and Procedures |
| 5 | Double Major (A, B) | A: 48 (12 courses) B: 44 (11 courses) | 12+18+9 The 24 credits in the Minor stream are distributed between the two Majors. 2 MDC, 2 SEC, 2 VAC and the Internship should be in Major A. Total credits in Major A should be 48 + 20 = 68 (50% of 133) | | | 133 | Economics and Mathematics double major |

| | 1 MDC, 1 SEC and 1 VAC should be in Major B. Total credits in Major B should be 44 + 9 = 53 (40% of 133) | | | | | |
|---|--|--|--|--|--|--|
| Exit with UG Degree / Proceed to Fourth Year with 133 Credits | | | | | | |

- I. Students in Single Major pathway can choose course/courses from any of the Minor/ Vocational Minor groups offered by a discipline other than their Major discipline.
- II. Students in Major with Multiple Disciplines pathway can choose as one of the multiple disciplines, all the three courses from any one of the Minor/ Vocational Minor groups offered by any discipline, including their Major discipline. If they choose one of the Minor/ Vocational Minor groups offered by their Major discipline as the first one of the multiple disciplines, then their choice as the second one of the multiple disciplines should be any one of the Minor/ Vocational Minor groups offered by a discipline other than the Major discipline. If the students with major Economics choose any one of the Minor/ Vocational Minor groups in Economics as given above, then the title of the group will be the title of that multiple discipline. If the students with major other than Economics choose any two Minor groups in Economics as given above, then the title of the Minor will be Economics
- III. Students in Major with Minor pathway can choose all the courses from any two Minor groups offered by any discipline other than major discipline. If the students with major other than Economics choose any two Minor groups in Economics as given above, then the title of the Minor will be Economics. Students in Major Economics with Minor pathway cannot choose all the courses from the Minor groups of Economics. But students with major Economics opting minor pathway can choose all the courses from two groups of Quantitative Economics (given below).
- IV. Students in Major with Vocational Minor pathway can choose all the courses from any two Vocational Minor groups offered by any discipline. If the students choose any two Vocational Minor groups from Economics as given above, then the title of the Vocational Minor will be Economics.

GROUPING OF MINOR COURSES IN QUANTITATIVE ECONOMICS

(These two groups of minor courses may be taken by major students in Economics. If they take both the groups given below, then the name of the minor program is **OUANTITATIVE ECONOMICS**)

(Title of the Minor: QUANTITATIVE ECONOMICS)

Quantitative economics is a specialized field that focuses on the application of mathematical and statistical techniques to analyze economic phenomena and solve economic problems. Its significance and career prospects are noteworthy due to the increasing reliance on data-driven decision-making across various sectors. Quantitative economics plays a key role in government agencies, policy analysts evaluate the potential economic impact of proposed legislation and policies. They use statistical analysis to predict outcomes and assess the effectiveness of current policies. Quantitative economics has extensive real-world applications, making it a valuable field of study with diverse career prospects. Professionals in this field are equipped with the analytical tools and quantitative skills needed to tackle complex economic issues across various industries, including finance, consulting, government, academia, international organizations, and the tech industry. The ability to apply rigorous quantitative methods to real-world problems ensures that quantitative economists remain in high demand and are well-prepared to make significant contributions in their chosen careers.

EVALUATION SCHEME

- 1. The evaluation scheme for each course contains two parts: internal evaluation (about 30%) and external evaluation (about 70%). Each of the Major and Minor courses is of 4-credits. It is evaluated for 100 marks, out of which 30 marks is from internal evaluation and 70 marks, from external evaluation. Each of the General Foundation course is of 3-credits. It is evaluated for 75 marks, out of which 25 marks is from internal evaluation and 50 marks, from external evaluation.
- 2. The 4-credit courses (Major and Minor courses) are of two types: (i) courses with only theory and (ii) courses with 3-credit theory and 1-credit practical.
 - In 4-credit courses with only theory component, out of the total 5 modules of the syllabus, one open-ended module with 20% content is designed by the faculty member teaching that course, and it is internally evaluated for 10 marks. The internal evaluation of the remaining 4 theory modules is for 20 marks.
 - In 4-credit courses with 3-credit theory and 1-credit practical components, out of the total 5 modules of the syllabus, 4 modules are for theory and the fifth module is for practical. The practical component is internally evaluated for 20 marks. The internal evaluation of the 4 theory modules is for 10 marks.
- 3. All the 3-credit courses (General Foundational Courses) in Economics are with only theory component. Out of the total 5 modules of the syllabus, one open -ended module with 20% content is designed by the faculty member teaching that course, and it is internally evaluated for 5 marks. The internal evaluation of the remaining 4 theory modules is for 20 marks.
- The students can write the external examination in Economics either completely in English or in Malayalam.

| Sl. No. | Nature of the Course | | | ation in Marks of the total) | External Exam | Total Marks |
|------------|----------------------|--------------------------------------|-------------------------------------|---------------------------------|-------------------------|----------------|
| | | | Open-ended module / Practical | On the other 4 modules | on 4 modules (Marks) | |
| 1 | 4-credit course | only theory (5 modules) | 10 | 20 | 70 | 100 |
| 2 | 4-credit course | Theory (4 modules) + Practical | 20 | 10 | 70 | 100 |
| 3 | 3-credit course | only theory (5 modules) | 5 | 20 | 50 | 75 |

| | | 20 | 10 | 10 | 20* | | | | |
| | Total | 30 |) | 30 | | | | | |

1.1. INTERNAL EVALUATION OF THEORY COMPONENT

* Refer the table in section 1.2 for the evaluation of practical component

1.2. EVALUATION OF PRACTICAL COMPONENT

The evaluation of practical component in Major and Minor courses is completely by internal evaluation.

- Continuous evaluation of practical by the teacher-in-charge shall carry a weightage of 50%.
- The end-semester practical examination and viva-voce, and the evaluation of practical records shall be conducted by the teacher in-charge and an internal examiner appointed by the Department Council.
- The process of continuous evaluation of practical courses shall be completed before 10 days from the commencement of the end-semester examination.
- Those who passed in continuous evaluation alone will be permitted to appear for the endsemester examination and viva-voce.

The scheme of continuous evaluation and the end-semester examination and viva-voce of practical component shall be as given below:

| Sl. No. | Evaluation of Practical Component | Marks for | Weightage |
|---------|--|-----------|-----------|
| | of Credit-1 in a Major / Minor Course | Practical | |
| 1 | Continuous evaluation of practical/ exercise | 10 | 50% |
| | performed in practical classes by the students | | |
| 2 | End-semester examination and viva-voce to be | 7 | 35% |
| | conducted by teacher-in-charge along with an | | |
| | additional examiner arranged internally by the | | |
| | Department Council | | |

| 3 | Evaluation of the Practical records submitted for the | 3 | 15% |
|---|---|----|-----|
| | end semester viva-voce examination by the teacher-in- | | |
| | charge and additional examiner | | |
| | Total Marks | 20 | |

1.3. EXTERNAL EVALUATION OF THEORY COMPONENT

External evaluation carries 70% marks. Examinations will be conducted at the end of each semester. Individual questions are evaluated in marks and the total marks are converted into grades by the University based on 10-point grading system (refer section 5).

| Duration | Туре | Total No. of Questions | No. of | Marks for | Ceiling |
|-------------|--------------------|---------------------------|-----------------|-----------|---------|
| | | | Questions to be | Each | of |
| | | | Answered | Question | Marks |
| 2 Hours | Short Answer | 10 | 8 - 10 | 3 | 24 |
| | Paragraph/ Problem | 8 | 6 – 8 | 6 | 36 |
| | Essay | 2 | 1 | 10 | 10 |
| Total Marks | | | | | 70 |

2. INTERNSHIP

- All students should undergo Internship of 2-credits during the first six semesters in a firm, industry or organization, or training in labs with faculty and researchers of their own institution or other Higher Educational Institutions (HEIs) or research institutions.
- Internship can be for enhancing the employability of the student or for developing the research aptitude.
- Internship can involve hands-on training on a particular skill/ equipment/ software. It can be a short project on a specific problem or area. Attending seminars or workshops related to an area of learning or skill can be a component of Internship.
- A faculty member/ scientist/ instructor of the respective institution, where the student does the Internship, should be the supervisor of the Internship.

2.1. GUIDELINES FOR INTERNSHIP

- 1. All students shall undergo Internship or Apprenticeship in a firm, industry or organization, or training in labs with faculty and researchers of their own institution or other Higher Educational Institutions (HEIs) or research institutions.
- 2. For an internship, one credit of Internship means two-hour engagement per week. Accordingly, in a semester of 15 weeks' duration, two credits in this course is equivalent to 60 hours of engagement.

- 3. The students involved in the internship may continue their internship subject to the condition that his/her academic credits do not get affected in terms of attendance and other assignments. If the need arises, students may also have an opportunity to make use of summer & winter breaks for extending their learning from internships.
- 4. The internship aims to impart:
 - The students should have an understanding and ability to develop solutions for real-life problems.
 - The students will be made aware of the research ethics, professional accountability, conduct and will be able to practice the research ethics and appropriate skills in his/her own research work.
 - The student will be able to enhance academic productivity by developing writing and reading skills and can make contributions towards social and economic issues.
 - The intern can possess an attitude and skill of adaptability and flexibility for new challenges at organizational and individual level with a mindset of teamwork and collaborations.
 - To increase the likelihood of securing future employment and to explore and clarify carrier goals.
 - To develop a strong work ethics, time management and professionalism in a professional environment.
- 5. Role of Internship Coordinator
 - An internship coordinator is a teacher, who will be nominated by the Department Council (DC) for monitoring and supervising the student during the internship duration. This person will be nominated at the start of the academic year for each batch.
 - Internship Supervisor from the host institute should monitor the regularity of the intern at his/her workplace. On the completion of internship, the student should submit the project report in the prescribed format along with internship completion certificate issued by Internship Supervisor/authority from host organization. The project report shall be evaluated by faculty member delegated by the department council.
 - Students can choose following organizations and mentor from HEIs/research organizations/registered industries/registered media organizations/and companies/registered retail service providers/R&D labs and centres. They can also opt Cooperative Organizations/Banking and nonbanking organizations/Insurance companies/Stock Broking Companies/Microfinance Institutions/Other national and international reputed institutions/libraries in HEIs and registered under library council /NGOs/certified farmers/plantations/local self-governing bodies/ outside India experts working at the

international level, Organizations under State Government/Central Government, elected representatives to the parliament/ state assembly. Students can also undertake an internship from national/international reputed institutions through online mode.

- 6. Guidelines for Internship Report
 - The Internship certificate should be certified by the Head of the Institution. It should contain the Name of the Student, Name of the Internship course, Name of the Institute, Type of work done and duration of work (60 hrs).
 - Internship Report should contain 3000-5000 words typed in Times New Roman, size 12, 1.5 space, on double sides and neatly soft bound. It should be submitted to the concerned Department before VI Semester university Exam Notification.
 - The Internship Report should be in the following structure
 - a) Title page- Title of the Internship, Name and Register Number of the Student, Year, Name of the institute and name of the college and department.
 - b) Declaration
 - c) Certificate signed by the Head of the Institution (Internship Institute)
 - d) Index
 - e) Content Page Introduction Nature of the work Methodology Outcome of the work Limitations Suggestions

2.2. EVALUATION OF INTERNSHIP

- The evaluation of Internship shall be done internally through continuous assessment mode by a committee internally constituted by the Department Council of the college where the student has enrolled for the UG Honours programme.
- The credits and marks for the Internship will be awarded only at the end of semester 6.
- The scheme of continuous evaluation and the end-semester viva-voce examination based on the submitted report shall be as given below:

| Sl. No. | Components of Evaluation of Internship | | Marks for Internship 2 Credits | Weightage |
|---------|--|------------------------------------|--------------------------------------|-----------|
| 1 | Continuous evaluation of internship through interim | Acquisition of skill set | 10 | 40% |
| 2 | presentations and reports by the committee internally | Interim Presentation and Viva-voce | 5 | |
| 3 | constituted by the Department Council | Punctuality | 5 | |

| 4 | Report of Institute Visit/ Study Tour | | 5 | 10% |
|---|--|--------------------------|----|-----|
| 5 | End-semester viva-voce examination to be | Quality of the work | 6 | 35% |
| б | conducted by the | Presentation of the work | 5 | |
| 7 | committee internally constituted by the Department Council | Viva-voce | 6 | |
| 8 | Evaluation of the day-to-day records, the report of internship supervisor, and final report submitted for the end semester viva–voce examination before the committee internally constituted by the Department Council | | 8 | 15% |
| | | Total Marks | 50 | |

3. PROJECT

3.1. PROJECT IN HONOURS PROGRAMME

- In Honours programme, the student has the option to do a Project of 12-credits instead of three Core Courses in Major in semester 8.
- The Project can be done in the same institution/ any other higher educational institution (HEI)/ research centre/ training centre.
- The Project in Honours programme can be a short research work or an extended internship or a skill-based training programme.
- A faculty member of the respective institution, where the student does the Project, should be the supervisor of the Project.

3.2. PROJECT IN HONOURS WITH RESEARCH PROGRAMME

- Students who secure 75% marks and above (equivalently, CGPA 7.5 and above) cumulatively in the first six semesters are eligible to get selected to Honours with Research stream in the fourth year.
- A relaxation of 5% in marks (equivalently, a relaxation of 0.5 grade in CGPA) is allowed for those belonging to SC/ST/ OBC (non-creamy layer)/ Differently-Abled/ Economically Weaker Section (EWS)/ other categories of candidates as per the decision of the UGC from time to time.
- In Honours with Research programme, the student has to do a mandatory Research Project of 12-credits instead of three Core Courses in Major in semester 8.
- The approved research centres of University of Calicut or any other university/ HEI can offer the Honours with Research programme. The departments in the affiliated colleges under University of Calicut, which are not the approved research centres of the University, should get

prior approval from the University to offer the Honours with Research programme. Such departments should have minimum two faculty members with Ph.D., and they should also have the necessary infrastructure to offer Honours with Research programme.

- A faculty member of the University/ College with a Ph.D. degree can supervise the research project of the students who have enrolled for Honours with Research. One such faculty member can supervise maximum five students in Honours with Research stream.
- The maximum intake of the department for Honours with Research programme is fixed by the department based on the number of faculty members eligible for project supervision, and other academic, research, and infrastructural facilities available.
- If a greater number of eligible students are opting for the Honours with Research programme than the number of available seats, then the allotment shall be based on the existing rules of reservations and merits.

3.3. GUIDELINES FOR THE PROJECT IN HONOURS PROGRAMME AND HONOURS WITH RESEARCH PROGRAMME

- 1. Project can be done in topics related to Economics.
- 2. Project should be done individually.
- 3. Project work can be of experimental/ theoretical/ analytical in nature.
- 4. There should be minimum 240 hrs. of engagement from the student in the Project work in Honours programme.
- 5. There should be minimum 13 hrs./week of engagement (the hours corresponding to the three core courses in Major in semester 8) from the teacher in the guidance of the Project(s) in Honours programme and Honours with Research programme.
- 6. The various steps in project works are the following:
 - ➢ Wide review of a topic.
 - > Investigation on a problem in systematic way using appropriate techniques.
 - > Systematic recording of the work.
 - > Reporting the results with interpretation in a standard documented form.
 - > Presenting the results before the examiners.
- 7. A hard copy of the report should be kept for reference at the department. A soft copy of the report should be submitted in pdf format for external evaluation well in advance.
- 8. It is desirable, but not mandatory, to publish the results of the Project in a peer reviewed journal.

- 9. The project report shall have declaration from the student and certificate from the research supervisor for originality of the work, stating that the work has not been submitted for the award of any other degree/ diploma in the same institution or any other institution.
- 10. Plagiarism check report has to be incorporated in the project report after the declaration of the student.
- 11. The project proposal, institution at which the project is being carried out, and the project supervisor should be prior-approved by the Department Council of the college where the student has enrolled for the UG Honours programme.
- 12. Structure of the Project
 - Cover Page and Front Page
 - a. Title of the project
 - b. Degree for which project is submitted.
 - c. Name of the Candidate & University Register Number
 - d. Name of the College
 - e. Month and year of the project report submission
 - > Contents
 - a. Declaration by the student
 - b. Plagiarism check certificate
 - c. Certificate of the supervising teacher countersigned by the head of the department.
 - d. Acknowledgement.
 - e. Table of Contents
 - f. List of Tables
 - g. List of Figures
 - h. Introductory Chapter
 - i. Analysis Chapters
 - j. Concluding Chapter
 - k. Bibliography
 - 1. Appendix
 - Contents of the Introductory Chapter
 - 1. Introduction
 - 2. Review of literature
 - 3. Research Gap
 - 4. Statement of the problem
 - 5. Significance of the study

- 6. Scope of the study
- 7. Statement of objectives
- 8. Hypotheses (optional)
- 9. Methodology
 - a. Data sources
 - b. Tools of analysis (quantitative and qualitative)
 - c. Conceptual Framework-Optional (specification of terms and concepts)
- 10. Limitations of the study
- 11. Chapter outlines.
- Style of Report
 - 1. Report Length: 50 to 70 pages excluding Appendix and Certificates
 - 2. Alignment: Justify
 - 3. Font: Times New Roman
 - 4. Font size: 12
 - 5. Line spacing: 1.5
 - 6. Bibliography: APA style

3.4. EVALUATION OF PROJECT

- The evaluation of Project will be conducted at the end of the eighth semester by both internal and external modes.
- The Project in Honours programme as well as that in Honours with Research programme will be evaluated for 300 marks. Out of this, 90 marks is from internal evaluation and 210 marks, from external evaluation.
- The internal evaluation of the Project work shall be done through continuous assessment mode by a committee internally constituted by the Department Council of the college where the student has enrolled for the UG Honours programme. 30% of the weightage shall be given through this mode.
- The remaining 70% shall be awarded by the external examiner appointed by the University.
- The scheme of continuous evaluation and the end-semester viva-voce of the Project shall be as given below:

| Components of Evaluation of Project | Marks for the Project | Weightage |
|--|------------------------|-----------|
| | (Honours/ | |
| | Honours with Research) | |
| Continuous evaluation of project work through | 90 | 30% |
| interim presentations and reports by the | | |
| committee internally constituted by the | | |
| Department Council | | |
| End-semester viva-voce examination to be | 150 | 50% |
| conducted by the external examiner appointed by | | |
| the university | | |
| Evaluation of the day-to-day records and project | 60 | 20% |
| report submitted for the end-semester viva-voce | | |
| examination conducted by the external examiner | | |
| Total Marks | 300 | |

INTERNAL EVALUATION OF PROJECT

| Sl. No | Components of Evaluation of Project | Marks for the Project (Honours/ Honours with Research) |
|-------------|--|--|
| 1 | Skill in doing project work | 30 |
| 2 | Interim Presentation and Viva-Voce | 20 |
| 3 | Punctuality and Log book | 20 |
| 4 | Scheme/ Organization of Project Report | 20 |
| Total Marks | | 90 |

EXTERNAL EVALUATION OF PROJECT

| Sl. No | Components of Evaluation of Project | Marks for the Project (Honours/ Honours with Research) 12 credits |
|-------------|---------------------------------------|--|
| 1 | Content and relevance of the Project, | |
| | Methodology, Quality of analysis, | 50 |
| | and Innovations of Research | |
| 2 | Presentation of the Project | 50 |
| 3 | Project Report (typed copy), Log | 60 |
| | Book and References | 00 |
| 4 | Viva-Voce | 50 |
| Total Marks | | 210 |

4. GENERAL FOUNDATION COURSES

• All the General Foundation Courses (3-credits) in Economics are with only theory component.

4.1. INTERNAL EVALUATION

| Sl. No. | Components of Internal Evaluation of a General Foundation Course in Economics | Internal Marks of a General Foundation Course of 3-credits in Economics | | |
|---------|---|--|-------------------|--|
| | Foundation Course in Economics | 4 Theory Modules | Open-ended Module | |
| 1 | Test paper/ Mid-semester Exam | 10 | 2 | |
| 2 | Seminar/ Viva/ Quiz | 6 | 2 | |
| 3 | Assignment | 4 | 1 | |
| | | 20 | 5 | |
| Total | | | 25 | |

4.2. EXTERNAL EVALUATION

External evaluation carries about 70% marks. Examinations will be conducted at the end of each semester. Individual questions are evaluated in marks and the total marks are converted into grades by the University based on 10-point grading system (refer section 5).

| Duration | Туре | Total No. of | No. of | Marks for | Ceiling |
|-------------|--------------------|--------------|-----------------|-----------|---------|
| | | | Questions to be | Each | of |
| | | Questions | Answered | Question | Marks |
| | Short Answer | 10 | 8 - 10 | 2 | 16 |
| 1.5 Hours | Paragraph/ Problem | 5 | 4 – 5 | 6 | 24 |
| | Essay | 2 | 1 | 10 | 10 |
| Total Marks | | | | | |

PATTERN OF QUESTION PAPER FOR GENERAL FOUNDATION COURSES

5. LETTER GRADES AND GRADE POINTS

- Mark system is followed for evaluating each question.
- For each course in the semester letter grade and grade point are introduced in 10-point indirect grading system as per guidelines given below.
- The Semester Grade Point Average (SGPA) is computed from the grades as a measure of the student's performance in a given semester.
- The Cumulative GPA (CGPA) is based on the grades in all courses taken after joining the programme of study.
- Only the weighted grade point based on marks obtained shall be displayed on the grade card issued to the students.

| C1 | | | T 44 | C 1 | D C | <u>C1</u> |
|-----------|-------------------------------|-------------|-------------|------------|--------------|---------------------|
| Sl. | Percentage of Marks | Description | Letter | Grade | Range of | Class |

LETTER GRADES AND GRADE POINTS

- When students take audit courses, they will be given Pass (P) or Fail (F) grade without any credits.
- The successful completion of all the courses and capstone components prescribed for the threeyear or four-year programme with 'P' grade shall be the minimum requirement for the award of UG Degree or UG Degree Honours or UG Degree Honours with Research, as the case may be.

5.1. COMPUTATION OF SGPA AND CGPA

• The following method shall be used to compute the Semester Grade Point Average (SGPA): The SGPA equals the product of the number of credits (Ci) with the grade points (Gi) scored by a student in each course in a semester, summed over all the courses taken by a student in the semester, and then divided by the total number of credits of all the courses taken by the student in the semester,

i.e. SGPA (Si) = Σi (Ci x Gi) / Σi (Ci)

where Ci is the number of credits of the ith course and Gi is the grade point scored by the student in the ith course in the given semester. Credit Point of a course is the value obtained by multiplying the credit (Ci) of the course by the grade point (Gi) of the course.

$$SGPA = \frac{Sum of the credit points of all the courses in a semester}{Total credits in that semester}$$

| Semester | Course | Credit | Letter | Grade | Credit Point |
|----------|----------|--------|----------------|-------|------------------|
| | | | Grade | point | (Credit x Grade) |
| Ι | Course 1 | 3 | А | 8 | 3 x 8 = 24 |
| Ι | Course 2 | 4 | B+ | 7 | 4 x 7 = 28 |
| Ι | Course 3 | 3 | В | 6 | 3 x 6 = 18 |
| Ι | Course 4 | 3 | 0 | 10 | 3 x 10 = 30 |
| Ι | Course 5 | 3 | С | 5 | 3 x 5 = 15 |
| Ι | Course 6 | 4 | В | 6 | 4 x 6 = 24 |
| | Total | 20 | | | 139 |
| | | SGF | 139/20 = 6.950 | | |

ILLUSTRATION – COMPUTATION OF SGPA

• The Cumulative Grade Point Average (CGPA) of the student shall be calculated at the end of a programme. The CGPA of a student determines the overall academic level of the student in a programme and is the criterion for ranking the students.

CGPA for the three-year programme in CUFYUGP shall be calculated by the following formula.

$$CGPA = \frac{Sum of the credit points of all the courses in six semesters}{Total credits in six semesters (133)}$$

CGPA for the four-year programme in CUFYUGP shall be calculated by the following formula.

$$CGPA = \frac{Sum of the credit points of all the courses in eight semesters}{Total credits in eight semesters (177)}$$

- The SGPA and CGPA shall be rounded off to three decimal points and reported in the transcripts.
- Based on the above letter grades, grade points, SGPA and CGPA, the University shall issue the transcript for each semester and a consolidated transcript indicating the performance in all semesters.

Major Courses in Economics

| Programme | B.A. Economics | | | | | | | | |

| V | | Practical Assignments on economic decision making in different economies in the world | | | | |
| | | Seminar on the influence of institutions, regional cooperations, blocks and international cartels on economic policies | | | | |

Note: The syllabus has five modules. There should be total 22 units in the first four modules together, composed of the theory topics. The number of units in the last module can vary. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is designed to equip students with practical skills. The 20 marks for the evaluation of practical will be based on Module V. Internal assessments (30 marks) are split between the practical module (20 marks) and the first four modules (10 marks). The end-semester examination for the theory part will be based on the 22 units in the first four modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

| V | | Open Ended Module | 12 | | |
| | Discussion based on reports about economic problems | | | | |
| | | Discussion based on reports about economic problems such as high unemployment or rising government debt. | | | |
| | | | | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

| | 11 | Distributions of sample mean, Sample variance - chi square Student's t, and F distributions | 3 | | |
| | 12 | Small and large sample properties of Z, t, Chi Square and F | 2 | | |
| | 13 | Estimation of population parameters using method of OLS | 1 | | |
| | 14 | Estimation of population parameters using method of maximum likelihood procedures | 1 | | |
| | 15 | Point and interval estimation- Confidence intervals for population parameters | 1 | | |
| | 16 | Properties of estimators | 1 | | |
| IV | | Testing of Hypothesis | 11 | 16 | |
| | 17 | Simple and composite hypothesis- Null and alternative hypothesis | 1 | | |
| | 18 | Type I and Type II error, Critical region- Level of significance, Power | 1 | | |
| | 10 | of a test Test precedure. Test of significance in respect of Mean Properties. | 2 | | |
| | 19 | Test procedure - Test of significance in respect of Mean, Proportion, Variance and Correlation coefficient and their differences | Z | | |
| | 20 | Chi Square test of goodness of fit, and test for independence of attributes | 2 | | |
| | 20 | Non parametric tests - Sign test, Wilcoxon- Mann Whitney U Test, Signed rank test | 3 | | |
| | 22 | Kruskal Wallis test, Wald-Wolfowitz test | 2 | | |

| V | | Open Ended Module | 12 | | |
|---|---|---|----|--|--|
| | 1 | Develop critical thinking and problem-solving skills by applying statistical methods in Economic theories | | | |
| | 2 | Discussion based on statistical tools | | | |
| | 3 | 3 Practical Assignments | | | |
| | 4 | Seminar | | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

DETAILED SYLLABUS:

| Module | Unit | Content | Hrs | Marks |
|--------|------|--|-----|-------|
| Ι | | Basic Principles of Economics | 5 | 8 |
| | 1 | What is Econometrics? Methodology of Econometrics | 2 | |
| | 2 | Uses of Econometrics | 1 | |
| | 3 | Limitations of Econometrics | 1 | |
| | 4 | The concept of PRF -Significance of stochastic error term-The SRF | 1 | |
| II | | Simple linear regression model: Two variable case | 12 | 19 |
| | 5 | Ordinary least square estimation of a linear model | 2 | |
| | 6 | Assumptions underlying the method of least squares | 1 | |
| | 7 | Properties of estimators - The Gauss Markov theorem | 2 | |
| | 8 | Goodness of fit | 2 | |
| | 9 | Testing of hypothesis - Confidence intervals | 3 | |
| | 10 | Forecasting | 2 | |
| III | | Other functional forms of regression models | 12 | 19 |
| | 11 | Multiple linear regression model - Extension of the single explanatory variable case to a multivariate model(specification, interpretation of regression coefficients) | 2 | |
| | 12 | Multiple linear regression model- test of significance of partial regression coefficients, adjusted R^2 | 2 | |
| | 13 | Regression through the origin | 1 | |
| | 14 | Introducing non-linearity through functions of explanatory variables -Double log Model | 1 | |
| | 15 | Semilog models | 1 | |
| | 16 | Reciprocal model | 1 | |
| | 17 | Dummy Variable regression models - ANOVA & ANCOVA models- specification & interpretation of regression coefficients | 3 | |
| | 18 | Dummy variable trap | 1 | |
| IV | Vio | blation of classical assumptions: consequences, detection and remedies | 16 | 24 |
| | 19 | Multicollinearity- Nature, Practical Consequences, Detection methods: using R2 and t values, auxiliary regressions, Remedial measures: combining cross sectional and time series, transformation of variables | 4 | |
| | 20 | Heteroscedasticity – Nature, Consequences, Detection methods: Park test, Spearman's rank correlation test, White's general heteroscedasticity test, Remedial measures: WLS method, using plausible assumptions about heteroscedasticity pattern | 4 | |
| | 21 | Autocorrelation - Nature, Consequences, Detection methods: the Run's test, Durbin Watson d test, Remedial measures: GLS method | 4 | |
| | 22 | Specification Errors – Types, Consequences of underfitting and overfitting of model, Detection methods: DW d statistic, Ramsey's RESET test, Lagrange multiplier test | 4 | |

| v | Open Ended Module | 30 | |
|---|---|----|--|
| | Estimation of economic functional relationships using cross section | | |
| | data, interpretation and forecasting | | |
| | (Excel package can be used for doing the regression) | | |

Note: The syllabus has five modules. There are 22 units in the first four modules composed of the theory topics. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is an open module designed to equip students with practical skill to analyse updated information on the contemporary world. The 10 marks for the evaluation of practical will be based on Module V. The end-semester examination for the theory part will be based on the 22 units in the first four modules.

| Course Summary | The expected outcome is for students to gain a comprehensive understanding of game theory principles and their application in economics, fostering strong analytical, problem-solving, and policy evaluation skills essential for tackling real-world economic challenges. | | | | | | | |

| CO1 | Understand the theory of games |
|-----|--|
| CO2 | Analyze the decision making under interdependent situations |
| CO3 | Evaluate different strategies |
| CO4 | Can predict the optimal strategies of players and how the players can exploit strategic situations for their benefit |
| CO5 | The students can understand how to formulate different real life situations as games |

DETAILED SYLLABUS:

| Module | Unit | Content | Hrs | Marks |
|--------|------|---|-----|-------|
| Ι | | Introduction to Game Theory | 5 | 8 |
| | 1 | What is game theory? | 1 | |
| | 2 | History of game theory | 1 | |
| | 3 | Theory of rational choice | 2 | |
| | 4 | Interacting decision makers | 1 | |
| II | | Strategic Games and Nash Equilibrium | 14 | 22 |
| | 5 | Strategic games: examples | 3 | |
| | 6 | Nash equilibrium: concept and examples | 2 | |
| | 7 | Best response functions | 2 | |
| | 8 | Dominated Actions | 2 | |
| | 9 | Symmetric games and symmetric equilibria | 2 | |
| | 10 | Illustrations of Nash equilibrium-Cournot and | 3 | |
| | | Bertrand's model of duopoly market | | |
| III | | Mixed Strategy Equilibrium | 15 | 23 |
| | 11 | Introduction | 2 | |
| | 12 | Strategic games with randomisation | 2 | |
| | 13 | Mixed strategy Nash equilibrium: concept and | 2 | |
| | | examples | | |
| | 14 | Dominated Actions | 2 | |
| | 15 | Pure equilibria when randomization is allowed | 3 | |
| | 16 | Equilibrium in a single population | 2 | |

| | 17 | Formation of Players' beliefs | 2 | |
|----|----|--|----|----|
| IV | | Extensive Games with perfect information | 11 | 17 |
| | 18 | Introduction to extensive games | 2 | |
| | 19 | Strategies and outcomes | 2 | |
| | 20 | Nash equilibrium- Subgame perfect Nash | 2 | |
| | | equilibrium | | |
| | 21 | Backward induction | 2 | |
| | 22 | Illustrations of Extensive Games and Nash | 3 | |
| | | Equilibrium-Stackelberg model of duopoly markets | | |
| V | | Open Ended Module | 30 | |
| | 1 | Seminar on other examples like ; Bach or | | |
| | | Stravinsky, Matching Pennies the Stag Hunt etc | | |
| | 2 | Discussion on the importance of game theory in | | |
| | | modern economy | | |
| | 3 | Exercises- saddle point | | |

Note: The syllabus has five modules. There should be total 22 units in the first four modules together, composed of the theory topics. The number of units in the last module can vary. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is designed to equip students with practical skills. The 20 marks for the evaluation of practical will be based on Module V. Internal assessments (30 marks) are split between the practical module (20 marks) and the first four modules (10 marks). The end-semester examination for the theory part will be based on the 22 units in the first four modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Note: The syllabus has five modules. There should be total 22 units in the first four modules together, composed of the theory topics. The number of units in the last module can vary. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is designed to equip students with practical skills. The 20 marks for the evaluation of practical will be based on Module V. Internal assessments (30 marks) are split between the practical module (20 marks) and the first four modules (10 marks). The end-semester examination for the theory part will be based on the 22 units in the first four modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

| | 21 | Systemism and heterodoxy - key ideas and concepts | 2 | |
| | 22 | Heterodox economics in a systemist framework | 2 | |
| V | | Open Ended Module | 12 | |
| | | Discussion based on Feminist Economics, Ecological Economics and Radical Economics | |] |
| | | Seminars to discuss and evaluate the state of affairs and policy related to women and ecology. | |] |
| | | Group discussion and Assignments to understand radical economics. | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22

units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

| Unit | AILED SYLLABUS: Content | Hrs | Marks |
|------|---|---------------|-------|
| Ι | Environment and Economy | 12 | 17 |
| | 1 The Environment and Economy- meaning and scope of environmental economics- | 3 | |
| | 2 Major environmental problems, types of pollutions, Global warming and Ozone depletion. | 3 | |
| | 3 The environmental Kuznet curve- | 3 | |
| | 4 Limit to growth theory- Green GDP | 3 | |
| II | Externalities and Regulations | 15 | 22 |
| | ⁵ Market failure and causes | 2 | |
| | ⁶ Kinds of Externalities | 1 | |
| | 7 Negative externalities and inefficiency | 1 | |
| | ⁸ Positive externalities and inefficiency | 1 | |
| | Regulating externalities -prices- Fixing Emission standard and Emission Fees, Tradeable emission permits, recycling | 4 | |
| | 10 Pigouvian taxes | 1 | |
| | ¹¹ Optimum level of pollution control | 2 | |
| | 12 Property rights and Coase Theorem | 3 | |
| III | Measuring Environmental Values | 10 | 15 |
| | 13 Environmental impact assessment- preventive expenditure technique- | 4 | |
| | replacement cost technique- travel cost method-contingent valuation | | |
| | 14 National income accounting for the environment | $\frac{2}{2}$ | |
| | 15 The harvesting of renewable resources and maximum sustainable yield16 Non-renewable resources and optimal depletion | $\frac{2}{2}$ | |
| IV | · · · | <u> </u> | 16 |
| - ' | Sustainable Development | | 10 |
| | 17 Sustainable development: concepts and practices- measurement | 4 | |
| | 18 Earth summits | 1 | |
| | 19 Sustainable developmental goals | 1 | |
| | 20 Agenda 21 | 1 | |
| | 21 Sources and use of non-conventional and renewable energy | 2 | |
| | 22 Organic farming | 2 | |
| V | Open ended Module | 12 | |
| | Report on waste management by visiting local dumping yards of the local self- | | |
| | governments- report should contain the assessment and measurement of | | |
| | pollution-suggestion to reduce the problems related to waste management. or | | |
| | Visit organic farm houses and make report on its economic side | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-

ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, is only for the external examination.

| | | Kerala- issues – Kerala model of health. | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

| | | Seminar to present the student's understanding of monetary | | |
| | | policy using a particular economy's experience. | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

|--------|----|---|-----|-------|
| Ι | | Introduction | 9 | 13 |
| | 1 | Meaning and importance of mathematical economics | 2 | |
| | 2 | 2 | | |
| | | nonmathematical economics- mathematical economics versus | | |
| | | econometrics | | |
| | 3 | Ingredients of mathematical model-variables constants and | 2 | |
| | | parameters- equations and identities | | |
| | 4 | Equations- Linear and nonlinear equations- Variables and parameters | 3 | |
| | | - Quadratic equations -solving quadratic equation | 10 | 1.5 |
| II | | Set theory | 10 | 15 |
| | 4 | Set notations | 2 | |
| | 5 | Types of set- Operations of set | 2 | |
| | 6 | Law of set operations | 2 | |
| | 7 | Cartesian product | 2 | |
| | 8 | Ordered pairs | 1 | |
| | 9 | Relations and functions | 1 | |
| III | | Graphs and Economic Functions | 12 | 17 |
| | 11 | Equations of straight line- Point of intersection of two lines | 2 | |
| | 12 | Concepts of slope and intercept | 2 | |
| | 13 | Graphical solutions of simultaneous equations | 2 | |
| | 14 | Application of straight lines in economics- Demand and supply | 3 | |
| | | analysis- determination of equilibrium price and quantity | | |
| | 15 | Economic functions: Demand function – supply function- utility | 3 | |
| | | function- Consumption function- production function- cost function- | | |
| | | Revenue function- Saving function- investment function | | |
| IV | | Basic matrix algebra | 17 | 25 |
| | 16 | Matrices: Meaning and types | 2 | |
| | 17 | Operations of matrix- Addition, subtraction, multiplication | 2 | |
| | 18 | Determinants-Properties | 2 | |
| | 19 | Inverse of a matrix | 3 | |
| | 20 | Rank, trace and norm of matrix | 2 | |
| | 21 | Solution of equations- Crammer's Rule | 3 | |
| | 22 | Solution of equations-inverse method | 3 | |
| V | | Open Ended Module | 12 | |
| | 1 | Assignment – theory part of demand, consumption, cost etc | | |
| | 2 | Seminar on theory topics | | |
| | 3 | Draw graphs and diagrams using excel | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22

units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-

ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

| | | Regression as Parameter Fitting | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

DETAILED SYLLABUS:

| Module | Unit | Content | Hrs | Marks |
|--------|------|---|-----|-------|
| Ι | | Data Story Exploration & Explanation | 8 | 12 |
| | 1 | Narratives in Numbers (Understanding how to find, collect, and analyze economic data; Spotting stories within numerical data; Developing a "data mindset" for better decision-making; Crafting compelling narratives using data) | 3 | |
| | 2 | Effective Infographics (Exploring various ways to depict economic data visually; Choosing the right chart or infographic to convey clear and powerful messages; Revealing new insights through data visualization; Avoiding potential pitfalls and deceptive visual representations) | 3 | |
| | 3 | Storytelling Techniques (Learning the art of storytelling with economic data; Understanding the components of data stories: narrative, data, and visuals; Crafting engaging narratives around complex economic concepts; Presenting data effectively and visually appealing) | 2 | |
| II | | Visualizing Time Series Data Line Plots and Time Series Graphs (Understanding the | 15 | 22 |
| | | basics of line plots and their suitability for visualizing time series data; Creating line graphs to represent economic trends over time; Highlighting seasonality, cyclical patterns, and long-term changes using time series graphs) | | |
| | 5 | Seasonal Subseries Plots (Exploring seasonal variations in economic data; Constructing subseries plots to visualize patterns within specific seasons (e.g., monthly or quarterly); Identifying recurring patterns and anomalies related to seasons) | 2 | |
| | 6 | Autocorrelation Plots (Analyzing autocorrelation in time series data; Creating autocorrelation plots to assess the relationship between observations at different lags; Detecting periodicity and potential predictive patterns) | 3 | |
| | 7 | Histograms for Time Series Data (Using histograms to understand the distribution of economic variables over time; Identifying central tendencies, variability, and potential outliers; Comparing the distribution of economic indicators across different time periods) | 1 | |
| | 8 | Interactive Visualizations for Dynamic Data (Building interactive dashboards that allow users to explore economic data over time; Incorporating tooltips, sliders, and other interactive elements) | 3 | |
| | 9 | Identifying Anomalies and Outliers (Detecting sudden changes, spikes, or dips in economic time series: Visualizing anomalies using scatter plots, box plots, or | 2 | |

| 1 | 1 | | | |
|-------------|----|---|----|-----|
| | | threshold-based techniques; Understanding the impact of outliers on economic analysis) | | |
| | 10 | Comparing Multiple Time Series (Visualizing | 1 | |
| | | economic performance across different sectors, regions, | | |
| | | or countries; Overlaying multiple time series on a single | | |
| | | graph for comparative analysis; Highlighting relative | | |
| | | growth rates, trends, and disparities) | | |
| III | | Data Story Narrative | 15 | 22 |
| | 11 | Narrative Structure for Data Stories (Understanding | 2 | |
| | | the fundamental elements of storytelling (e.g., | | |
| | | protagonist, complication, resolution); Applying | | |
| | | narrative structures (e.g., Aristotle's Tragedy | | |
| | | Structure, Campbell's Hero's Journey) to data stories; | | |
| | | Crafting a compelling narrative arc for economic data | | |
| | | insights) | | |
| | 12 | Setting the Scene: Current Situation (Introducing the | 4 | |
| | | context and background of the economic problem or | | |
| | | scenario; Describing the current state of affairs using | | |
| | | relevant data points; Creating a hook to engage the | | |
| | | audience in the data story) | | |
| | 13 | Insights Leading to the Central Point (Unveiling key | 3 | |
| | | insights derived from economic data analysis; | | |
| | | Presenting data-driven findings that build up to the | | |
| | | central insight; Using visualizations to support and | | |
| | | emphasize these insights) | | |
| | 14 | Recommendations and Implications (Proposing | 2 | |
| | | actionable recommendations based on the data insights; | | |
| | | Discussing the implications of the central insight for | | |
| | | decision-makers; Addressing potential challenges or | | |
| | | risks associated with the recommendations) | | |
| | 15 | Crafting Engaging Data Narratives (Techniques for | 2 | |
| | | making data stories memorable and persuasive. | | |
| | | Weaving data points into a coherent and relatable | | |
| | | narrative; Balancing quantitative information with | | |
| | | qualitative storytelling) | | |
| | 16 | Effective Communication Techniques (Tailoring the | 2 | |
| | | data story to different audiences (e.g., executives, | | |
| | | policymakers, general public); Choosing the right tone, | | |
| | | language, and level of detail; Leveraging storytelling | | |
| | | techniques (e.g., anecdotes, metaphors) to enhance | | |
| TT 7 | | understanding and retention) | 10 | 1.4 |
| IV | 17 | Data Story Planning & Design | 10 | 14 |
| | 17 | Narrative Structure for Data Stories (Applying narrative | 2 | |
| | | structures (e.g., Aristotle's Tragedy Structure, | | |
| | | Campbell's Hero's Journey) to data stories; Crafting a | | |
| | 10 | compelling narrative arc for economic data insights) | 2 | |
| | 18 | Setting the Scene: Current Situation (Introducing the | 2 | |
| | | context and background of the economic problem or | | |
| | | scenario; Describing the current state of affairs using | | |
| | | relevant data points; Creating a hook to engage the | | |

| 1 | | | | |
|---|----|---|----|--|
| | | audience in the data story) | | |
| | 19 | Insights Leading to the Central Point (Unveiling key | 1 | |
| | | insights derived from economic data analysis; | | |
| | | Presenting data-driven findings that build up to the | | |
| | | central insight; Using visualizations to support and | | |
| | | emphasize these insights) | | |
| | 20 | Recommendations and Implications (Proposing | 2 | |
| | | actionable recommendations based on the data | | |
| | | insights; Discussing the implications of the central | | |
| | | insight for decision-makers; Addressing potential | | |
| | | challenges or risks associated with the | | |
| | | recommendations) | | |
| | 21 | Crafting Engaging Data Narratives (Techniques for | 2 | |
| | | making data stories memorable and persuasive; | | |
| | | Weaving data points into a coherent and relatable | | |
| | | narrative; Balancing quantitative information with | | |
| | | qualitative storytelling) | | |
| | 22 | Effective Communication Techniques (Tailoring the | 1 | |
| | | data story to different audiences (e.g., executives, | | |
| | | policymakers, general public); Choosing the right tone, | | |
| | | language, and level of detail; Leveraging storytelling | | |
| | | techniques (e.g., anecdotes, metaphors) to enhance | | |
| | | understanding and retention) | | |
| V | | Open ended module | 12 | |
| | 1 | Ethical Considerations in Data Visualization (Explore | | |
| | | the ethical implications of data visualization in | | |
| | | economic contexts; Discuss issues related to bias, | | |
| | | misrepresentation, and privacy; Encourage critical | | |
| | | thinking about responsible data visualization practices) | | |
| | 2 | Interactive and Dynamic Visualizations (Dive into | | |
| | | creating interactive dashboards and dynamic | | |
| | | visualizations; Understand the benefits of interactive | | |
| | | elements (e.g., tooltips, filters, animations); Learn how | | |
| | | to engage users through interactive data exploration) | | |
| | 3 | Visualizing Uncertainty and Risk (Address uncertainty | | |
| | - | in economic data (e.g., confidence intervals, prediction | | |
| | | intervals); Visualize risk scenarios using probabilistic | | |
| | | methods; Explore techniques for conveying | | |
| | | uncertainty in economic forecasts) | | |
| L | · | | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers on ly the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

| IV | | Advanced Topics in Machine Learning for Economics | 13 | 19 |
|----|----|---|----|----|
| | 17 | Causal Inference and Econometrics (Counterfactual analysis and causal | 2 | |
| | | inference; Propensity score matching and regression discontinuity | | |
| | | design; Incorporating machine learning techniques for causal analysis) | | |
| | 18 | Time Series Forecasting (ARIMA (AutoRegressive Integrated Moving | 2 | |
| | | Average) models; Exponential smoothing methods; Deep learning for | | |
| | | time series prediction (e.g., LSTM networks)) | | |
| | 19 | Natural Language Processing (NLP) in Economics (Text mining and | 2 | |
| | | sentiment analysis; Topic modeling (e.g., Latent Dirichlet Allocation); | | |
| | | Applications in analyzing economic news, research papers, and social | | |
| | | media data) | | |
| | 20 | Reinforcement Learning (RL) for Decision-Making (Markov Decision | 2 | |
| | | Processes (MDPs) and RL fundamentals; Q-learning, policy gradients, | | |
| | | and actor-critic algorithms; Economic applications (e.g., optimal | | |
| | | pricing, resource allocation)) | - | |
| | 21 | Interpretable Machine Learning (SHAP (SHapley Additive | 2 | |
| | | exPlanations) values and feature importance; LIME (Local | | |
| | | Interpretable Model-agnostic Explanations); Ensuring transparency and | | |
| | | accountability in ML models) | | |
| | 22 | Ethical Considerations in ML for Economics (Bias and fairness in ML | 3 | |
| | | models; Privacy-preserving techniques; Responsible AI practices in | | |
| V | | economic applications) | 12 | |
| v | 1 | Open ended module Economic Forecasting with Machine Learning (Explore how ML | 14 | |
| | 1 | techniques can enhance economic forecasting; Discuss time series | | |
| | | models, ensemble methods, and deep learning for predicting economic | | |
| | | indicators (e.g., GDP growth, inflation rates); Consider the challenges | | |
| | | of incorporating ML into existing forecasting frameworks) | | |
| | 2 | Ethical and Social Implications of ML in Economics (Delve into the | | |
| | - | ethical considerations related to ML deployment in economic contexts; | | |
| | | Discuss bias, fairness, and transparency; Explore case studies where | | |
| | | ML models have had unintended consequences in economic decision- | | |
| | | making) | | |
| | 3 | Interdisciplinary Applications of ML in Economics (Investigate how | | |
| | | ML intersects with other fields (e.g., behavioral economics, finance, | | |
| | | development economics); Explore applications such as recommender | | |
| | | systems for personalized financial advice, fraud detection, and impact | | |
| I | 1 | | | |
| | | evaluation. Encourage students to think beyond traditional economic | | |

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Note: The course is divided into five modules, with four modules together having total 19 fixed units and one open-ended module with a variable number of units. There are total 36 instructional hours for the fixed modules and 9 hours for the open-ended one. Internal assessments (25 marks) are split between the open-ended module (5 marks) and the fixed modules (20 marks). The final exam, however, covers only the 19 units from the fixed modules. The 50 marks shown in the last column, distributed over the first four modules, are only for the external examination.

DETAILED SYLLABUS:

| Module | | Content | Hrs | Marks |
|--------|---|--|-----|-------|
| | | Personal Financial Planning/Financial Literacy | 10 | 14 |
| | Basic | s of financial planning | | |
| | 1 | Meaning of financial planning and the importance of financial planning. | 1 | |
| | 2 | Risk vs return (inflation risk, market risk and exchange risk). | 1 | |
| | 3 | Planning for the short, medium and long term. | | |
| I | 4 | Introducing financial products that suit short, medium and long timehorizons. | 3 | |
| | 5 | Short term and money market or debt instruments | | |
| | 6 Long term and asset backed investments. | | | |
| | Time value of money | | | |
| | 7 | Inflation and its impact on personal financial security, | | |
| | 8 | Concepts of absolute income and real income. | 3 | |
| | 9 | Concepts of nominal rate of interest and real rate of interest. | | |
| | 10 | Principles of compounding and discounting. | 2 | |
| | | The financial planning process | 08 | 11 |
| | 11 | The fact find or taking stock ones financial situation, identifying presentprovisions and shortfalls. | 3 | |
| II | 12 | Setting SMART (specific, measurable, achievable, | 2 | |
| | | c, timebound) financial goals. | | |
| | 13 | Concept of diversification-putting your eggs into different baskets. | 1 | |
| | 14 | Physical assets like commodities (gold, silver and other preciousmetals) and properties. | 2 | |
| | | Financial products | 08 | 11 |
| | 15 | Savings bank accounts, current account, fixed deposits, recurring deposits. Introducing and debit cards. Modes of transfers-IMPS, NEFT, RTGS, UPI. | 2 | |
| III | 16 | Bonds, debentures and other debt funds. | 1 | |
| | Equity market products, Risks involved in equity market investments.stocks, shares, equities, mutual funds, derivatives, options. | | | |
| | 18 | NSE, BSE, OTC Exchange of India. Stock market indices, Nifty,SENSEX, S&P, NASDAQ. | 2 | |

| | | Insurance and pension products | 10 | 14 |
|----|----|--|----|----|
| IV | 19 | Insurance as a risk management device. Life insurance, | 2 | |
| | | | | |
| | | endowment plans, | | |
| | | unit-linked policies (ULIPs etc.), Riders in insurance (eg. critical | 2 | |
| | | illnessbenefit, hospitalisation benefit, permanent total disability | | |
| | | etc.). Property and casualty insurance, health/medical insurance. | | |
| | | Two rules of | | |
| | | calculating life cover-multiples of salary and the inflation rule. | | |
| | | The need for retirement security. Pension products. Difference | | |
| | 20 | between statutory pension system and contributory pension. | 2 | |
| | | National Pension system and its features. Tier I and Tier II | | |
| | | contributions in the NPS. Investment options-active choice and | | |
| | | auto choice. | - | |
| | 21 | Annuities. Difference between annuities and pensions. Various | 2 | |
| | | types of annuities-fixed, variable and equity linked. | | |
| | 22 | Retirement pension policies of life insurance companies. | 2 | |
| | | Annuity | | |
| | | service providers (ASP). Role of IRDAI and PFRDA as | | |
| | | regulators. | 0 | |
| | | Open Ended Module | 9 | |
| | | Discussion based on the exit of governments from pension | | |
| | | provision. | | |
| v | | Practical Assignments to create a sample personal financial plan | | |
| v | | for an individual/ family making provisions for emergency | | |
| | | funds, savings, insurances and retirement schemes. | | |
| | | Seminar/workshop on investor awareness with a | | |
| | | focus onstock/equity investments. | | |

Note: The course is divided into five modules, with four modules together having total 19 fixed units and one open-ended module with a variable number of units. | Module | Unit | Content | Hrs | Marks |
|--------|------|---|-----|-------|
| Ι | | Introduction to R and R studio. | 7 | 10 |
| | 1 | Basics of R programming | 1 | |
| | 2 | R Markdown files | 2 | |
| | 3 | Primitive Object Types: Vectors, List | 2 | |
| | 4 | Matrices, Arrays, Factors, Data frames. | 2 | |
| II | | Loops in R and Functions in R. | 6 | 8 |
| | 5 | if, else, while and for loops. | 2 | |
| | 6 | apply () class functions | 2 | |
| | 7 | Writing your own function | 2 | |
| III | | UNIT 3 Data management with Tidyverse | 12 | 17 |
| | 8 | Importing and exporting data | 2 | |
| | 9 | Introduction to tidyverse and tidy workflow | 2 | |
| | 11 | Data extraction | 2 | |
| | 12 | Data cleaning | 1 | |
| | 13 | Data formatting and wrangling | 2 | |
| | 14 | Creating summary statistics tables | 1 | |
| | 15 | Basic data analysis using tidyverse | 2 | |
| IV | UNIT | 4 Data Visualisation and Basics of Plotting in R | 11 | 15 |
| | 16 | Creating plots with base R functions. | 1 | |
| | 17 | Introduction to ggplot. Data visualization using | 1 | |
| | | ggplot2 | | |
| | 18 | Linear models - Generic functions for extracting | 3 | |
| | | model information - Linear (Multiple Regression) | | |
| | | Models | | |
| | 19 | The (Model Formula in Straight Line Regression) - | 6 | |
| | | Analysis of variance (ANOVA) and ANOVA tables | | |
| V | | Open Ended Module | 9 | |
| | U | se Various models learned in the above modules | | |

Note: The course is divided into five modules, with four modules together having total 19 fixed units and one open-ended module with a variable number of units. There are total 36 instructional hours for the fixed modules and 9 hours for the open-ended one. Internal assessments (25 marks) are split between the open-ended module (5 marks) and the fixed modules (20 marks). The final exam, however, covers only the 19 units from the fixed modules. The 50 marks shown in the last column, distributed over the first four modules, are only for the external examination.
