

Biochemistry

Core course (2020 syllabus)

Programme Specific Outcomes (PSOs)

PSO1	Demonstrate the core concepts in Biochemistry and thereby get expertise in modern biology
PSO2	Utilize chromatography, spectroscopy, electrophoresis, and molecular biology tools for biochemical analysis
PSO3	Interpret metabolic pathways, enzyme kinetics, and biochemical markers in disease diagnosis
PSO4	Engage in biochemical research and apply knowledge in pharmaceuticals, food science, and biotechnology
PSO5	Understand biochemical aspects of nutrition, metabolic disorders, and lifestyle diseases.
PSO6	Be equipped for advanced education and professional roles in research, healthcare, and industry
